## What are Financial Statements?

Financial statements are the bedrock of financial reporting. They provide a snapshot of a company's financial health and performance over a specific period. The three primary financial statements include:

- **Balance Sheet:** Presents a company's assets, liabilities, and owner's equity at a specific point in time.
- **Income Statement:** Summarizes a company's revenues, expenses, and profits over a particular period.
- **Cash Flow Statement:** Reports the sources and uses of cash within a company over a specific period.

## Why Financial Statements Matter

Financial statements are not just numbers on a page; they are a window into a company's financial performance. They enable you to:

- Assess a company's financial health and stability
- Identify potential investment opportunities
- Evaluate a company's profitability and growth trajectory
- Forecast future financial performance
- Make informed business decisions
