Diversity of Frogs: A Kaleidoscope of Forms and Colors

Prepare to be awestruck by the sheer variety of frogs that populate our planet. Frogs Eoin Mclaughlin showcases this incredible diversity through stunning photographs and engaging descriptions. From tiny thumbnail-sized frogs to colossal Goliath frogs, from vibrant poison dart frogs to the elusive glass frog, each species exhibits a unique array of colors, patterns, and forms.

Ecology of Frogs: Guardians of Aquatic Ecosystems

Frogs play pivotal roles in the intricate web of life that sustains our planet's aquatic ecosystems. Frogs Eoin Mclaughlin delves into the intricate ecological relationships that frogs maintain, highlighting their importance as predators, prey, and indicators of environmental health. Explore the fascinating world of frog calls, their social interactions, and the intricate adaptations that allow them to thrive in various habitats.

Frogs are integral components of aquatic ecosystems, engaging in complex interactions that shape the delicate balance of nature.

Conservation of Frogs: A Call to Action

However, the future of these remarkable creatures is threatened by habitat loss, pollution, and the global climate crisis. Frogs Eoin Mclaughlin raises awareness about the urgent need for conservation efforts, empowering readers to become active stewards of our planet's biodiversity. Learn about the threats facing frogs and the inspiring initiatives underway to protect them.

SAVE THE FROGS!

SAVE THE FROGS DAY
April 28th 2009

Frogs are disappearing!

2,000 amphibian species are threatened with extinction and may not survive the 21st century.
200 amphibian species have already gone extinct since 1979, and this is not normal!

Threats to Frogs

- Habitat Destruction
- Pollution & Pesticides
- Global Warming
- Infectious Diseases (spread by humans!)
- Over-harvesting for the pet & food trades
- Invasive Species

Frogs are important!

- Frogs are an integral part of the food web
- Frogs are bioindicators
- Frogs eat ticks, mosquitoes and other disease vectors
- Humans use frogs in medicinal research
- Frogs are cool!

How to Help

- Don't use pesticides - Don't eat frog legs - Don't purchase wild-caught amphibians as pets - Slow down driving on wet nights - Do not stock non-native fish in your pond or stream
- Do not purchase bottled water - Turn off the tap - Conserve resources - Reduce, Re-use, Recycle - Use rechargeable batteries
- Vote for the environment - Become a herpetologist - Go vegetarian
- Eat locally grown, organic food - Spread the word about the amphibian extinction crisis!
