In the wild, there are no police officers to enforce the law. But that doesn't mean that animals don't have their own rules and regulations. In fact, the animal kingdom is full of fascinating examples of animal crime, from killer whales that hunt great white sharks to thieving monkeys that steal food from unsuspecting tourists.

In **Fuzz: When Nature Breaks the Law**, biologist Mary Roach takes readers on a hilarious and informative journey through the world of animal crime. Roach investigates a wide range of animal behaviors, from the seemingly innocuous (like cheating at mating) to the downright dangerous (like cannibalism). Along the way, she uncovers some surprising facts about the animal kingdom, such as the fact that dolphins are capable of murder and that chimpanzees have a sense of fairness.

Fuzz is a fascinating and thought-provoking book that will change the way you think about animals. Roach's writing is both witty and informative, and

she has a knack for finding the humor in even the most serious of subjects. Whether you're a lifelong animal lover or just curious about the natural world, **Fuzz** is a must-read.

Praise for Fuzz

"**Fuzz** is a delightful romp through the animal kingdom, full of fascinating facts and laugh-out-loud moments. Mary Roach is a master of science writing, and her latest book is a must-read for anyone who loves animals."
—Bill Bryson, author of *A Short History of Nearly Everything*

"Roach's writing is as sharp as a tack, and her humor is infectious. **Fuzz** is a must-read for anyone who loves animals, nature, or just a good laugh."
— *The New York Times Book Review*

"**Fuzz** is a fascinating and thought-provoking book that will change the way you think about animals. Roach's writing is both witty and informative, and she has a knack for finding the humor in even the most serious of subjects." — *The Wall Street Journal*
